

# What are Multi Cap Funds?

25% Large Cap Stocks

25% Mid Cap Stocks

25% Small Cap Stocks

# multi caps | why are they preferred

#### **Exposure to Broad Equity Market**

Multi cap funds are exposed to the entire spectrum of the market. With a fixed allocation to all segments of the equity market investors are equally exposed to wide spectrum of opportunities

#### **Market Cap Agnostic**

Allocations remain fixed across equity segments thereby taking away any effect of under or over impact of market cap on allocations

#### **Choice of Sectors**

Multi cap funds offer diversification choices across different industrial sectors like IT, banking/financial, automotive, FMCG, and profitable niche sectors too across market caps

#### **Risk Counterbalancing**

With broad representation across market caps, potential risks are counterbalanced through an appropriate rebalancing of the portfolio within the 25-50% band for each market cap

#### **Mix of Defensives and Potential Multi Baggers**

With large caps anchoring the portfolio's relative stability, the mid cap and small cap space present potential multi baggers to give a long term equity investor an opportunity to grow his money with respected names and pioneers in their respective fields

# multi cap funds | true market diversification

A multi cap strategy invests in equities by primarily maintaining a fixed allocation of 25% across market caps. Multi cap funds offer a balanced exposure to different segments of the market, which can reduce the overall volatility and risk of the portfolio. Multi cap funds can also benefit from the growth potential of mid cap and small cap stocks, which may outperform large cap stocks in certain phases of the market cycle

- Multi cap funds are equity funds that diversify their investment in different market capitalizations which are large cap, mid cap, and small cap companies
- Multi cap funds are required to maintain minimum 25% allocation in each of these segments. So, 75% of total assets of a multi cap fund must be invested in equity, and the remaining 25% can be invested in debt, cash or other securities
- The money manager selects the stocks based on factors such as growth potential, valuation, earnings quality, competitive advantage, etc.
- The money manager also adjusts the portfolio allocation according to the changing market conditions and opportunities
- Money managers can diversify across sectors to achieve your investment goals
- With an opportunity to earn higher returns over time, its important to include companies with strong corporate governance

# **quant active fund** | in synch with broad market opportunities

#### **Fund Positioning**

- For investors wishing to have a continuous exposure to all three market segments with a single investment in large cap, mid cap, and small cap businesses, with sound fundamentals, exhibiting long term growth potential
- Investors with a long-term horizon
   (5 years and above) and aiming for enhancing returns from mid and small cap equities while seeking a measure of stability with large caps
- Investors with higher risk appetite who wish to participate across the market

#### **Fund Strategy**

- The scheme invests minimum 75% across equity and related instruments of large, mid, and small cap companies
- The scheme has flexibility to invest between 25% 50% each in large, mid, and small caps across industries to optimize risk-return
  payoffs
- Our money managers construct an unconstrained portfolio and deftly rebalance the portfolio to achieve an optimum investment outcome while minimizing risk
- Our signature VLRT Framework and Predictive Analytics tools dynamically manages known risks and identifies opportunities

# quant active fund | reasons to buy

#### **Invests in Synch With Market Conditions**

The investment portfolio is tweaked in line with extant market conditions. If mid and small stocks become overvalued, the money manager can move to large caps to take a defensive position and preserve gains made till far

#### **Wide Exposure to Key Sectors**

The fund takes core and tactical positions in key sectors and companies that are instrumental in driving the Indian economy. Investors are hence exposed to multiple growth opportunities that emerge within the economy

#### **Long Term Portfolio Growth**

Provides a chance to grow your wealth with the high growth potential of mid and small cap companies that are on the cusp of a new level of growth with large caps lending relative stability to overall portfolio

#### **Diversification and Sector Rotation**

Provides diversification to the portfolio through valuable opportunities across market caps. The money manager will manage multiple rotations across market caps/companies/sectors in line with our Risk-On/Risk-Off view

#### **Growth with Defensive Capability**

The ability to defend the portfolio during volatility by allocation to large caps is always available, during bouts of volatility, while chasing significant growth prospects in mid and small caps during the Risk-On phase

#### **Blend of Growth and Value**

Provides both growth and value investing to investors due to its large and varied investment universe, thereby making it a suitable wealth creator in the long run

# quant active fund | key scheme benefits

#### **Suitable for Novice Investors**

Due to its multi cap exposure which is an inherent risk-control feature, it is ideal for novice equity investors who may be unaware of risks associated with investing in companies of a certain size

#### **Defined Cap Limits**

The fund can increase or decrease holdings by small margins in each capitalization as per market trends, maintaining minimum 25% allocation in each cap, thereby limiting overexposure to any one segment of the equity market

#### **Risk Managed Portfolio**

Spreading investments across market capitalizations and sectors minimizes the impact of any one market cap or sector's performance on the overall portfolio and protects against market volatility and significant losses

#### **Conviction Based Investing**

Our focus is very clear on aiming to make alpha, so we focus extensively on onboarding promising companies with sustainable business models and visionary management and exhibiting reasonable price and earnings multiples

#### **Tactical Wealth Creation**

Investors can participate in the bull rally across the breadth of the market whenever it occurs and then return to relatively safer and stable positions in large cap companies when the tide turns

#### **Dynamic Money Management**

The fund adapts to changing market conditions, with our experienced money managers actively adjusting the portfolio. This approach aims for consistent returns and effective navigation through market cycles

#### **Investment Process**

Global Risk Appetite Analysis and Global Liquidity Analysis to determine the flow of money across asset classes, regions and countries

Indian Risk Appetite Analysis and Domestic Liquidity Analysis to determine whether it is a "Risk On / Risk Off" Environment

Money Flow Analysis can help identify stocks at inflection points that are experiencing a shift in perception

The VLR components of our VLRT framework spring into action and help us shortlist stocks

Lastly, it comes down to "Timing" – a function of all our analytical factors

> quant Portfolio

quant pursues global research with a focus on financial markets and the real economy which includes the real economy and leveraged economy. We place a large emphasis on the role of participants' behavior. This idea has evolved into a multi-dimensional research perspective which is now formulated in our VLRT framework.

In a dynamic world, it is not just a choice but a necessity to adopt a multi-dimensional approach

The world is becoming non-linear and parabolic and to stay relevant, money managers must think with an unconstrained mind, actively update their methods and earnestly search for absolute returns, considering all markets and asset classes

# "Analysis Adds Up"

We believe safeguarding investor wealth is paramount. Apart from reducing risk by investing across asset classes, we take diversification to another dimension by ensuring every investment decision comes from a focused discussion between investment managers, research analysts and analytics team – each with diverse sets of capabilities and experiences

# VLRT framework | the 4 dimensions in motion | dynamic risk mitigation via effective market timing

#### Sandeep Tandon | Founder & Chief Investment Officer

Sandeep is the founder & chief investment officer of the quant Group and has a vast experience of over 30 years in the capital markets. His journey in the money management business started in FY 1992-93 with GIC mutual fund (a JV partner with George Soros in India) where he was a trainee. He later joined IDBI Asset Management (now Principal Asset Management), where he was a founding member and was part of the core team that initialized the asset management business. He played a key role in devising, conceptualizing and marketing one of India's most successful mutual fund schemes: IDBI I-NITS 95. Furthermore, Sandeep worked in pivotal positions at several reputed financial services firms including ICICI Securities (a JV partner with J P Morgan in India), Kotak Securities (a J V partner with Goldman Sachs in India) and REFCO (erstwhile global derivatives firm). He has also worked at the Economic Times Research Bureau (a research wing of Bennett, Coleman and Company Limited)

Sandeep's credentials as a Global Macro Strategist are well established. He has channeled his vast experiences, interests and novel thinking into building the Predictive Analytics framework and the dynamic VLRT investment framework of the quant group. It is these frameworks coupled with his deep understanding of various asset classes at a global level, including, credit, commodities, equities and now digital currencies that enable Sandeep in definitive identification of market inflexion points and arrive at conclusive micro and macro calls.

Sandeep has a strong belief in quant Group's role as a knowledge partner in creating awareness about latest developments in investment philosophy and ideas, such as behavioral research. It is for this reason that he believes investor education is of utmost importance and the group, under his leadership, has undertaken many initiatives in this regard. Based on this belief Sandeep authored a book titled 'Being Relevant' which was published in May 2019. This book builds on research covering decades, even centuries of data points, distilled through quant's VLRT Framework and Predictive Analytics indicators. The book further outlines the potential trajectory for the world in the coming decades that can help money managers and investors prepare for volatile times which will upend the conventional analytical methods and beliefs of the past decades

### quant | money managers

#### **Ankit Pande, CFA | Money Manager**

Ankit has an experience of over 12 years in Indian equities and over 3 years in software products. He started his career in core banking software with Infosys' Finacle, nurturing the product with large banking clients in APAC and small and mid-sized banks in India. He then moved in to equity research, along the way picking up the (U.S. based) CFA charter and a masters in business administration from The Chinese University of Hong Kong in 2017, being placed on the school's Dean List. He won the Thomson Reuters StarMine Award for best stock picker in the IT sector in 2014 and is a lifetime member of the Beta Gamma Sigma academic honour society. Over 2015-2019, Ankit ventured into seed stage fund raising, equity sales & relationship management in APAC. In his spare time, Ankit likes to read books on business cycle theory, macroeconomics & geopolitics

#### Vasav Sahgal, CFA | Money Manager

Vasav is one of the youngest and most dynamic top rated Money Manager in the Mutual fund Industry. After clearing 3 levels of the CFA program, he started his journey with the quant Group as an investment analyst for equity as well as fixed income instruments. On a day to day basis, he is primarily responsible for equity asset allocation and credit research. Vasav is passionate about developing models using coding and has been deploying advanced data analytics in python for improved valuation analytics. Given his role, Vasav is the embodiment of our strategy – Adaptive Asset Allocation. In his spare time, Vasav enjoys drumming and reading financial literature extensively
