qsif

SECTOR ROTATION LONG-SHORT FUND

An open-ended investment strategy investing in equity and equity related instruments including limited short exposure in equity through derivative instruments, of maximum four sectors.

Sector Rotation Dynamics (2017–2026)

Historical analysis of 9 Nifty Sectoral indices proves that no single sector dominates consistently

Leadership rotates rapidly, validating the need for an active long-short sectoral strategy

qsif
SECTOR ROTATION LONG-SHORT FUND

An open-ended investment strategy investing in equity and equity related instruments including limited short exposure in equity through derivative instruments, of maximum four sectors.

High Performance Dispersion

The gap between the best and worst performing sectors
in a single quarter frequently exceeds 30%

qsif

SECTOR ROTATION LONG-SHORT FUND

An open-ended investment strategy investing in equity and equity related instruments including limited short exposure in equity through derivative instruments, of maximum four sectors.

The Solution!

An active investment strategy which can go long on sectors expected to outperform and go short on sectors expected to witness drawdowns

qsif

SECTOR ROTATION

LONG-SHORT FUND

The market cycle will once more prove to be the human-nature cycle; its economic background will have changed, but not its basic character nor the consequences of its character

– Benjamin Graham
(American economist and investor)

Markets are cyclical and different sectors lead at different times

basic construct | flexible 4-sector allocation model

qsif SECTOR ROTATION LONG-SHORT FUND

MAXIMUM 4 SECTORS EXPOSURE

At any given point of time, the fund will take exposure to a maximum of 4 sectors which will result in a focused approach avoiding over diversification

NO SAME-SECTOR LONG-SHORT

The fund will be allowed to either have a long position or a short position on a sector ensuring that no stocks within the same sector have opposite positions

SCENARIO 1

4 Longs + 0 Shorts (65-100%)

SECTOR A, SECTOR C

SECTOR B, SECTOR D

SCENARIO 2

3 Longs (65-100%): SECTOR A, SECTOR B, SECTOR C

\+

1 Short (0-25%): SECTOR D

SCENARIO 3

2 Longs (65-100%): SECTOR A, SECTOR B

\+

2 Shorts (0-25%): SECTOR C, SECTOR D

SCENARIO 4

1 Long (65-100%): SECTOR A

\+

3 Shorts (0-25%): SECTOR B, SECTOR C, SECTOR D

GROSS EQUITY EXPOSURE = Gross Long Sectors + Gross Short Sectors

NET EQUITY EXPOSURE = Net Long Sectors – Gross Short Sectors

qsif

SECTOR ROTATION LONG-SHORT FUND

An open-ended investment strategy investing in equity and equity related instruments including limited short exposure in equity through derivative instruments, of maximum four sectors.

Money Flow Analytics (MFA)

MFA = Liquidity Analytics x Risk Appetite Analytics

MFA will be the guiding force for qsif Sector Rotation Long-Short Fund as money flow analytics predicts how money will shift from one sector to another

qsif sector rotation long-short fund
with the objective of low volatility & lesser drawdowns

Indicative* asset allocations, risk profiling & ranges

Instruments	Risk Profile	Range %
All cap cash equity / equity arbitrage	High / Low Risk	65 - 100
All cap unhedged derivative strategies (Long)	High Risk	0 - 35
All cap unhedged derivative strategies (Short)	High Risk	0 - 25
Hedging	Moderate Risk	0 - 100
Margins (Cash, T-bills, G-secs)	Minimal Risk	0 - 15

Minimum equity exposure (Long + Short) will be 80%

Investments in equity including unhedged short exposure will be restricted to maximum of four sectors. Long-Short will apply at sector level i.e. all stocks in the portfolio of a particular sector will either be long or short.

A focused sectoral long-short strategy that will benefit from evolving positive as well as negative sector-specific developments & trends via extensive usage of derivative strategies within SEBI's prescribed regulatory limits

Please refer ISID for standard asset allocations

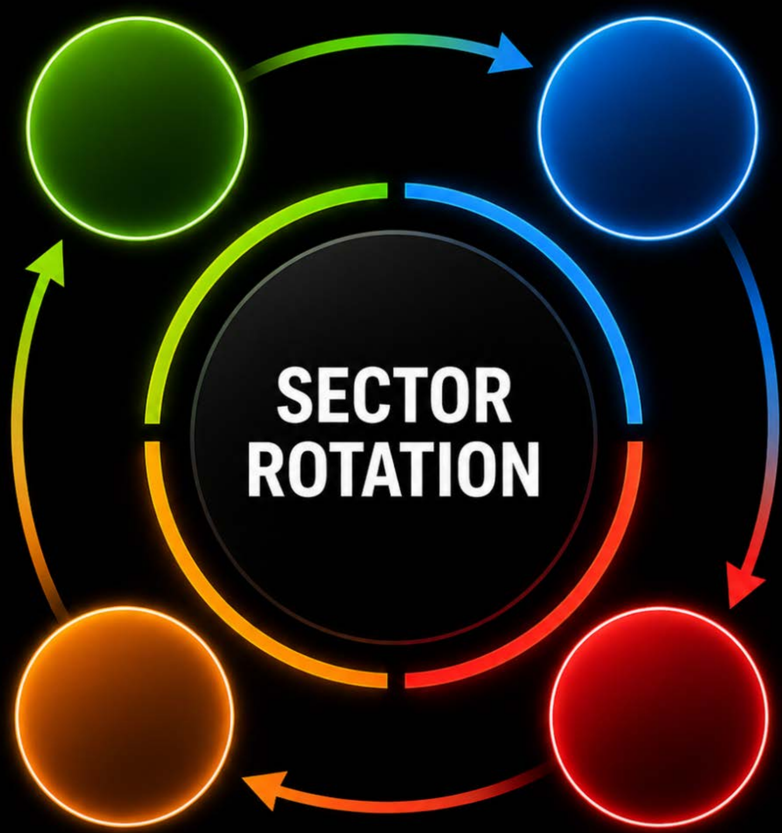
genesis of sector rotation cycle-aware strategy

qsif
SECTOR ROTATION
LONG-SHORT FUND

Sector performance varies materially across **different phases of the economic cycle, with distinct sectors benefiting from specific macroeconomic environments**

The sector rotation strategy seeks to **exploit this dispersion through active sector rotation**, reallocating capital to capture relative outperformance opportunities



As a result, **market cycles tend to lead economic cycles, creating opportunities to position ahead of key inflexion points**

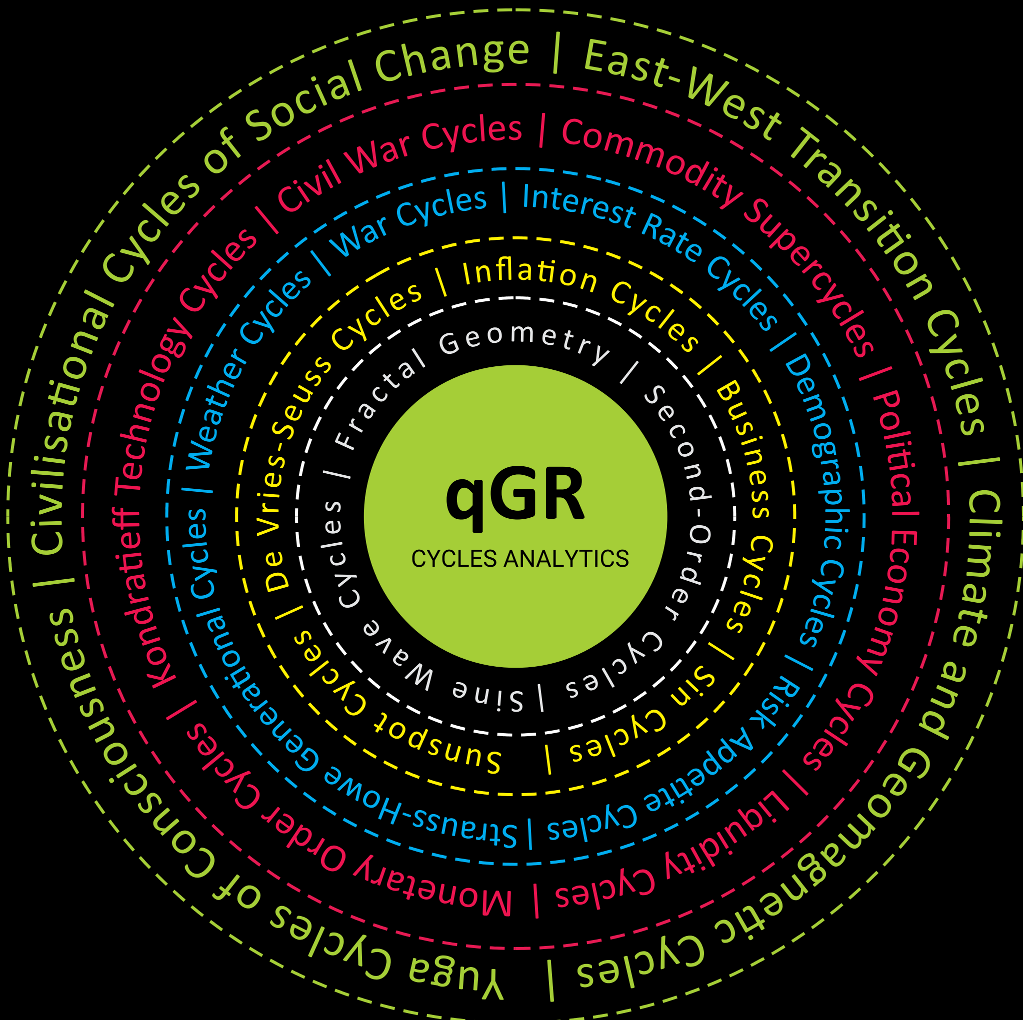
Financial markets are inherently forward-looking, typically **pricing in expected economic conditions in advance**

By aligning sector exposures with anticipated shifts in the market cycle, the strategy aims to generate alpha in a disciplined and systematic manner

Cycles Analytics

"science of prediction using the mathematics of cycles"

qsif SECTOR ROTATION LONG-SHORT FUND



- Cycles are the symphony of all the diverse cosmic phenomena and, the fundamental laws that drive the universe apply equally to financial markets
- Cycles are driven by a set of independent and interdependent dynamics
- Some cycles extend over the long-term, spanning millennia, while other cycles are much shorter, and may last only a few days
- Similarly, at the core of quant's Cycles Analytics is a probabilistic view of markets and by extension, the entire world
- A probabilistic viewpoint is of great importance to mitigate risk in the markets, and quant's Cycles Analytics ensures that this statistical perspective is hardcoded into our investment frameworks
- From the study of various cyclical phenomenon, we apply the concepts of cycle analytics and inflexion point analytics mathematically in our VLRT ('T' for Timing Analytics) and MARCOV investment frameworks ('C' for Cycles Analytics)

qsif
SECTOR ROTATION
LONG-SHORT FUND

EASY TO UNDERSTAND
LINER EXPLANATION

DEEP-ROOTED
PREDICTIVE CYCLICAL DYNAMICS

BREAKING FREE FROM LINEAR THINKING – EMBRACING A PROBABILISTIC PERSPECTIVE

- quant’s Cycles Analytics goes beyond linear cause-and-effect analysis by first identifying clear trends in the economy or society and then looking for periodicity in the data
- If there is substantial evidence of a distinct rhythm to the trend, it qualifies as a cycle of interest and the information is used in conjunction with other cycles and data to update probabilities of future events
- Similarly, in the markets, after observing a trend or dynamic we take the right macro and historical viewpoint to unearth deep-rooted long term cyclical dynamics
- Such cyclical clues form part of quant’s Cycles Analytics on various time-frames, which are of great use in predicting secular trends across geographies, countries and industries
- We observe and analyse ‘Cycles Synchronicity' – the simultaneous occurrence of cycle troughs or crests – that helps predict major inflexion points

identifying long-short opportunities
in every sector cycle
qsif
SECTOR
ROTATION
LONG-SHORT FUND

opportunistic through sector cycles

qsif SECTOR ROTATION LONG-SHORT FUND

The fund employs a sophisticated **multi-cycle rotation framework** to systematically identify which sectors should be overweighted (long) and which should be underweighted or shorted. Rather than static sector allocation, the fund dynamically rebalances across a maximum of 4 sectors at any given time, capitalizing on the cyclical nature of sector performance driven by three interconnected forces:

- **Macroeconomic Cycle:** The macroeconomic cycle reflects the broad expansion and contraction phases of the economy, typically progressing through four stages: Early Cycle, Mid Cycle, Late Cycle, and Recession/Recovery
- **Earnings Cycle:** The earnings cycle represents the quarterly/annual progression of corporate profitability and guidance revisions. Sectors rotate based on earnings surprises, margin trends, and guidance revisions
- **Liquidity Cycle:** The liquidity cycle reflects the availability of capital in the financial system, driven by central bank policy, credit conditions, and foreign capital flows

"Returns in equities are driven more by **where you invest** than **what you pick**"

Sectors mentioned are for illustrative purpose only and may not necessarily form a part of the scheme portfolio

portfolio construction rules

SECTOR ROTATION LONG-SHORT FUND

Clear Rules Ensure Strategic Coherence and Risk Discipline

The fund operates under a set of inviolable portfolio construction rules that prevent conflicts, ensure clarity of positioning, and maintain risk discipline across all market conditions.

Rule	Specification	Rationale
Sector Segregation	Long sectors ≠ Short sectors	Prevents conflicting views
Sector Concentration	Maximum 4 sectors at a time	Ensures research depth
Gross Exposure Cap	Long + Short ≤ 100% of AUM	Controls leverage
Long Exposure	0% to 100% of AUM	Full flexibility
Short Exposure	0% to 25% of AUM	Limits short risk
Single Stock Long	Maximum 10% of AUM	Diversification
Single Stock Short	Maximum 10% of AUM	Risk management

Rebalancing: Real-time

Long positions can be hedged via single stock derivatives for downside protection

advantages

qsif SECTOR ROTATION LONG-SHORT FUND

Avoids Sector Traps
Dynamically realigns long and short exposures and aims to enhance structural resilience and avoids sector traps

Accessible Expertise
Enables investors to participate in complex sector rotation and tactical positioning without requiring deep market timing skills

Capital Efficiency
Focused exposures allow investors to gain targeted sector insights without over-diversification

Active Money Management
Expert money managers actively manage the portfolio, striving to deliver strong risk-adjusted performance

Turnkey Approach to Sector Rotation
Provides a turnkey strategy, aligning exposures with economic trends without the need for sector selection by investors

Tax Efficiency
Strategic portfolio adjustments executed without generating taxable events, maintaining full compounding potential

why add qsif Sector Rotation long-short fund to existing mf portfolio

qsif SECTOR ROTATION LONG-SHORT FUND

qsif Sector Rotation Long-Short Fund expresses a focused thesis on sectoral cycles rather than relying on overall market direction. This allows investors to avoid timing decision for investing in different sectoral funds, provides a potential alpha generation opportunity through shorting of sector expected to face strong headwinds and gives exposure to a portfolio of high conviction bets

1 Reduction in volatility	2 Enhance diversification and reduce drawdowns	3 Source of additional alpha
Adding SIF strategies to an investor's existing MF portfolio could statistically reduce overall portfolio volatility and improve risk metrics	Short positions will further enhance diversification of an investor's existing portfolio with long bias, reducing drawdowns and improving risk-adjusted returns	Short positions provide hedge opportunities and also represent a unique source of potential alpha in an investor's portfolio

why qsif

SECTOR ROTATION
LONG-SHORT FUND

qsif integrates globally accepted **Long-Short** strategies with **transparency**, **accessibility**, **tax efficiency** and **ease of execution** of traditional mutual fund schemes

quant: powerhouse for long-short strategy

1

Deep Market Expertise & Leadership Experience

Led by one of India's earliest institutional players in the derivatives and Badla markets, quant's Founder & CIO, Sandeep Tandon, brings proven expertise in quantitative research and multivariate investment strategies. His decades of leadership, combined with the team's experience across long-short equity, statistical arbitrage, and volatility arbitrage, ensure deep domain mastery that few in the market can rival

2

Advanced Data & High Frequency Capabilities

In its previous avatar, quant was an early adopter of co-location in India, launching a high-frequency trading desk that processed billions of data points with nanosecond precision, turning them into actionable strategies. From 2008 to 2018, quant's proprietary trading and facilitation desk consistently delivered absolute returns, demonstrating strong strategy execution and risk management

3

Trust of 1 crore investors

quant Mutual Fund has demonstrated steady growth among AMCs in India, delivering strong growth across schemes in past 5 years. The current equity MuM of ₹ 93,000* crore has grown from ₹ 35 crore in 2020 and has huge investors base of over 1 crore folios*

4

Relentless Dynamic Management

quant has been a pioneer of dynamic management in the Indian mutual fund industry, building its philosophy around constant portfolio calibration and swift decision-making

5

Robust, Evolving Investment Framework

Through quant's indicator suite — Risk Appetite, Liquidity, Money Flow, Perception, and Volatility Analytics — the investment process continuously adapts to changing market cycles. This enables resilience and adaptability in both volatile and stable environments, crucial for long–short strategies

6

Seamless Integration of Tech & Human Expertise

quant's Systematic Active Investing approach uniquely merges algorithmic rigor with the conviction of seasoned portfolio managers. This hybrid model allows swift response to market shifts without losing the depth of discretionary insight, a critical edge in dynamic long–short positioning

quantamine platform – the nerve centre of qsif

qsif SECTOR ROTATION LONG-SHORT FUND

quantamine is a fully integrated, in-house intelligence and execution architecture engineered for **latency-sensitive** multi-asset strategies. Designed as the central nervous system of the firm's investment operations, **it unifies risk, compliance, investments, and operations** into a frictionless, coordinated workflow. It ingests heterogeneous, high-dimensional datasets on **macroeconomy, microstructure, sentiment, liquidity, and volatility** into a single actionable layer. Its architecture deploys advanced pattern recognition models to detect regime shifts, liquidity stress points, and market microstructure anomalies, dynamically recalibrating risk exposure in real time

Born in **1995** as **Stockmagic** (erstwhile name of **quantamine**) on a personal computer at the Founder's residence, the platform grew into a large-scale effort employing 75 engineers at its peak. Its evolution has been forged in crises: **Risk Appetite Analytics** after the 2000 dot-com collapse to gauge shifts in investor tolerance, **Liquidity Analytics** during the 2008 financial crisis to track hidden fragilities in funding markets, and **Money Flow Analytics** as their synthesis to map cross asset capital movements. Post 2020 COVID-19 crash, **Perception Analytics** was reoriented from static earnings forecasts to model valuation multiples, while **Volatility Analytics** was expanded across asset classes to anticipate regime breaks and bolster proactive risk management

These pillars now form a tightly interlinked, adaptive framework that allows **quantamine** to anticipate market change with precision rather than react to it. Alongside, the platform delivers custom dashboards and performance analytics at any level of granularity. Extensive logging, maker-checker controls, and breach tracking ensure an auditable environment that balances agility with governance

> *"By fusing **predictive modelling with streamlined inter-team workflows, 'quantamine'** facilitates **market foresight** and enables **seamless execution of various kinds of strategies**"*

qsif

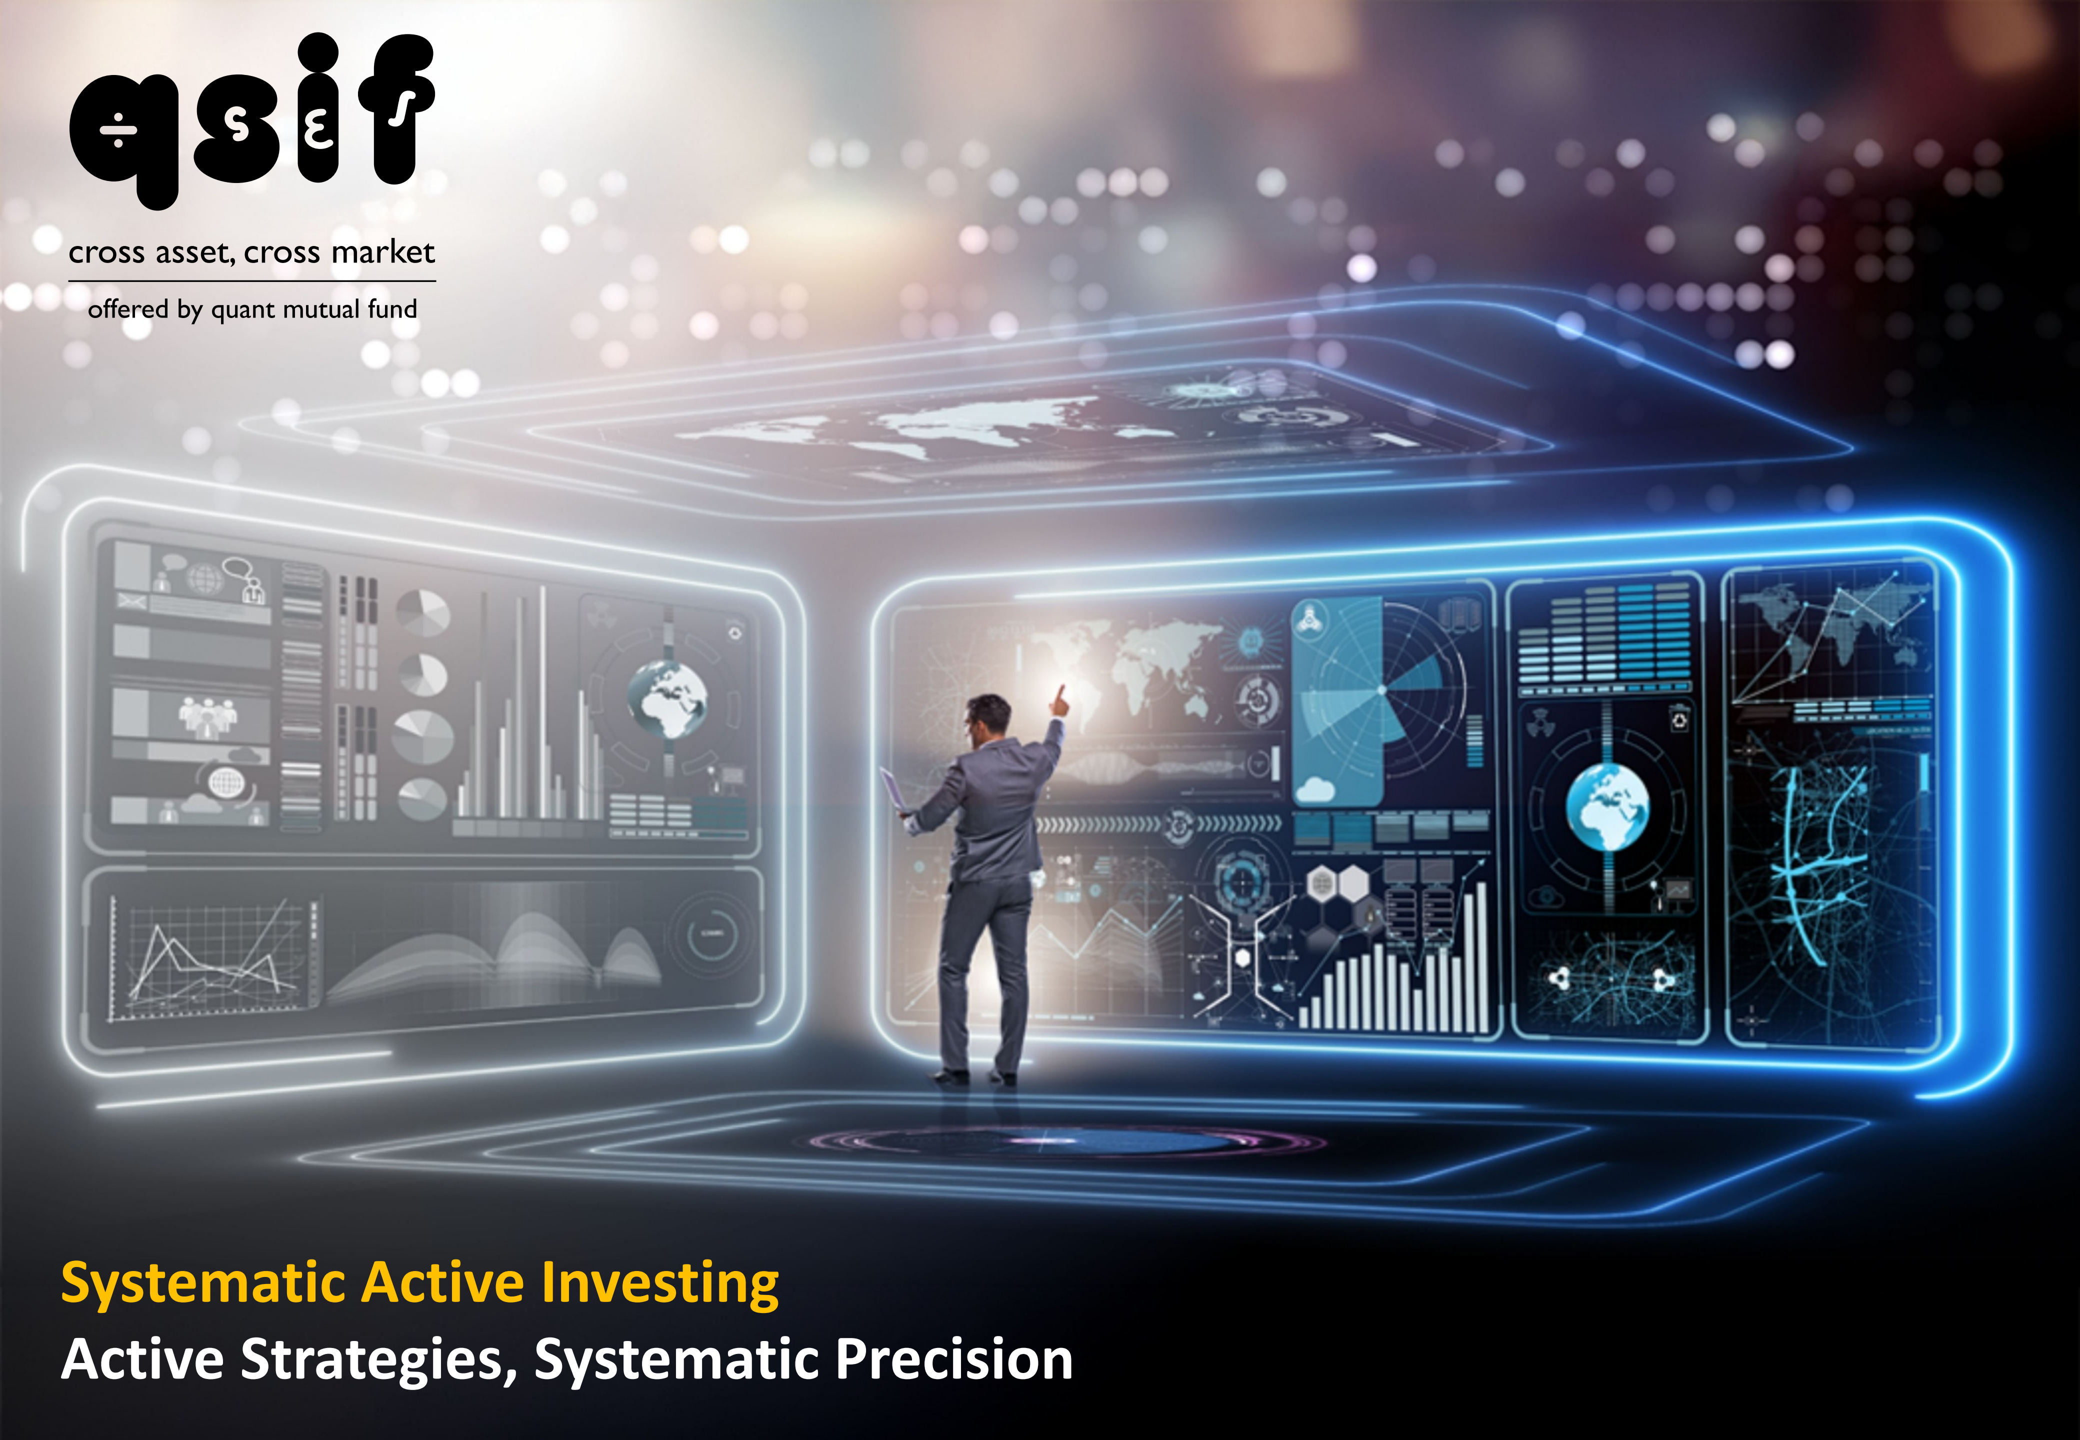
offered by quant mutual fund



Systematic Active Investing

Active Strategies, Systematic Precision

qsif SECTOR ROTATION LONG-SHORT FUND

Systematic Active Investing – structured intelligence, active precision

Systematic Active Investing is an investment style that **combines the structural discipline of passive investing with the adaptability and insight of discretionary active management**. It is a structured, rules-based decision architecture that is both conviction-driven and risk-aware

At quant, it forms the strategic backbone of qsif, enabling dynamic positioning across long–short portfolios with the objective of delivering steady performance through market cycles

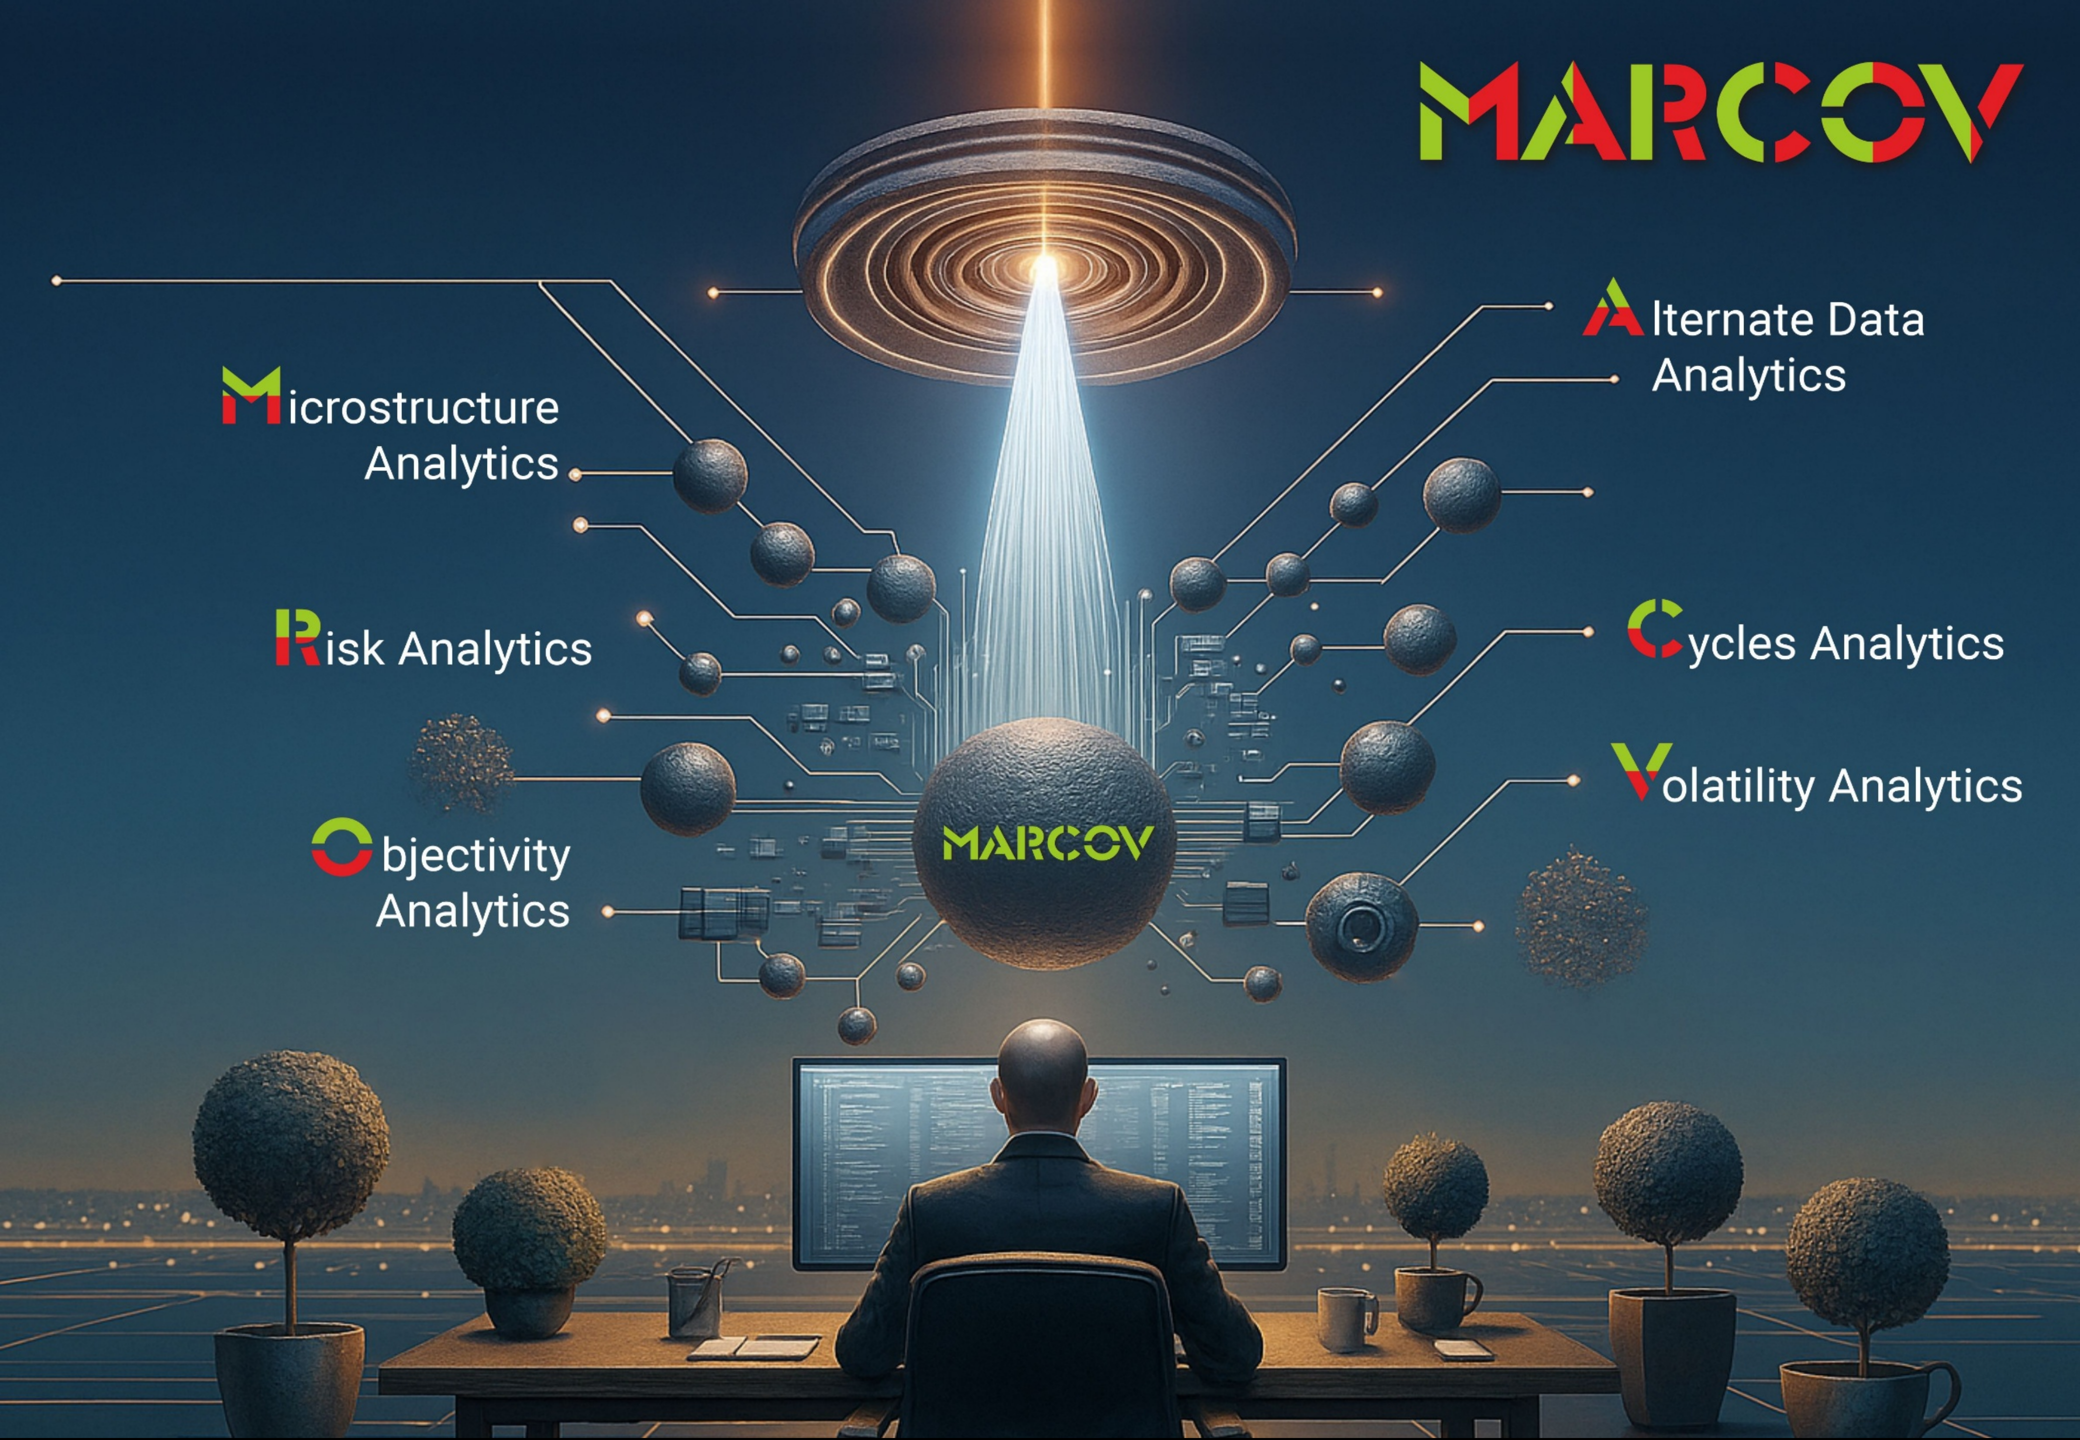
Systematic Active Investing **leverages machine intelligence, advanced analytics, and human insight** to identify opportunities across asset classes, construct resilient portfolios, and manage risks with precision

This style thrives on data density and analytical depth, continuously interrogating high-frequency signals, structural dislocations and behavioural anomalies across asset classes

It is a style **designed for today's complex, data-saturated financial markets**, where speed, scalability, and structure are key to sustainable alpha generation

All investment decisions originate from measurable signals derived from price behaviour, market microstructure and macro cycles with real-time data integration and multi-factor modelling

> *Unlike conventional active investing, which often depends on episodic human judgment, or passive investing which forgoes responsiveness,* ***Systematic Active Investing operates within a disciplined, repeatable and adaptive framework***



MARCOV
Microstructure Analytics
Risk Analytics
Objectivity Analytics
Alternate Data Analytics
Cycles Analytics
Volatility Analytics
MARCOV

introducing MARCOV – adaptive precision in every position

qsif SECTOR ROTATION LONG-SHORT FUND

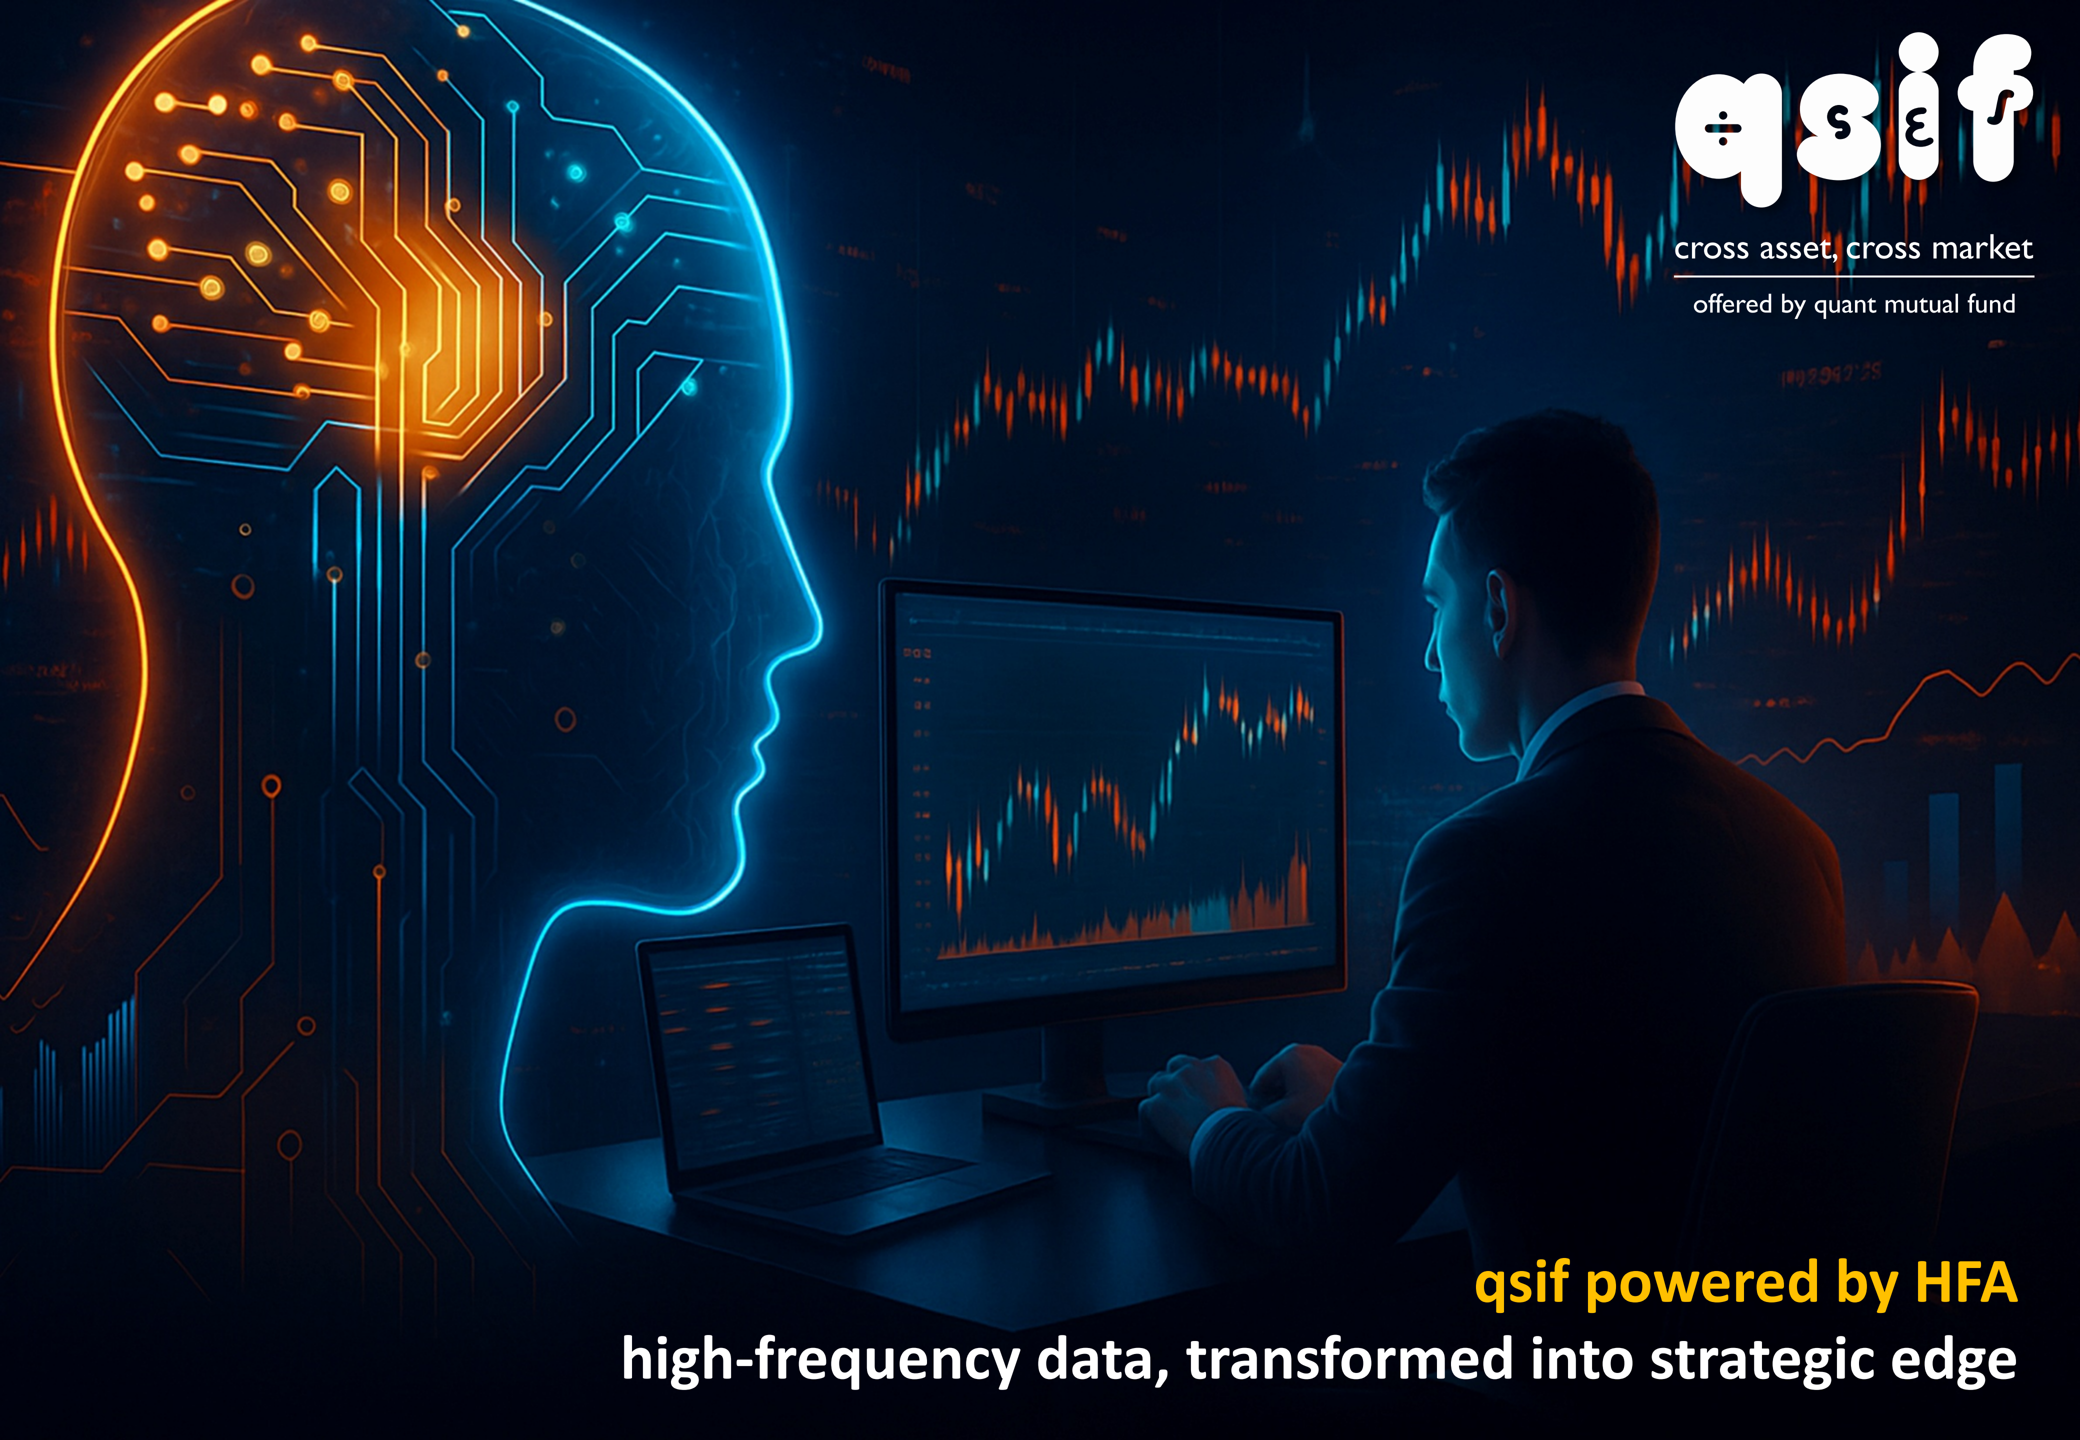
To implement the Systematic Active Investing style with precision and depth, we have developed MARCOV, a proprietary investment framework that **translates** the **philosophy** of Systematic Active Investing into an **actionable & adaptive allocation model**

MARCOV is a cross asset, regime-aware framework built to optimise long–short portfolios with asymmetric return potential, controlled volatility, and adaptive risk modulation. It employs a **scientific, data-driven approach** to achieve consistent, superior risk-adjusted returns while maintaining tighter control over volatility and exposure

Predominantly based on our **High Frequency Analytics (HFA),** it validates directional biases through a layered convergence model before capital is committed. The result is an integrated, forward-looking positioning model that can **systematically pivot between offensive and defensive stances**, ensuring that capital is consistently aligned with the prevailing and emerging market regime

Execution is governed by a dual-approval mechanism: **machine-calculated allocations undergo discretionary review by money managers** with deep domain-specific context, ensuring the macro-narrative alignment and risk considerations are embedded into the core decision layer

> *“This synergy between probabilistic models and systematic discipline **allows qsif to move fluidly across the risk spectrum** — from market-neutral stances to high-conviction directional allocations, while maintaining”*



qsif
cross asset, cross market
offered by quant mutual fund
qsif powered by HFA
high-frequency data, transformed into strategic edge

HFA – temporal microstructure intelligence for dynamic market navigation

qsif SECTOR ROTATION LONG-SHORT FUND

quant's **High Frequency Analytics (HFA)** is an institutional-grade microstructure intelligence system designed to map and monitor live capital flows and latent risk vectors, transforming them into actionable insight. It is not speed for speed's sake; it is temporal resolution—**the ability to observe markets at the finest granularity** and act with conviction when fleeting opportunities arise

Fractal mathematics teaches that within apparent randomness lie repeating motifs, and **HFA** identifies and maps these structures across intraday and multi-day cycles, **revealing actionable opportunities hidden beneath the noise**. This capability allows us to **monitor positions, exposures, and margins in real time**, enabling both risk containment and strategic agility without sacrificing structural perspective

HFA processes high-frequency inputs such as **trade data, depth dynamics, liquidity flows across assets and venues, flow imbalance, sentiment signals and volatility clustering** to discern inflexion points of market-regime shifts. The processing pipeline is built for nanosecond-level throughput, enabling seamless ingestion, computation, and feedback in real time. Advanced state-mapping modules quantify **order flow toxicity, track liquidity shocks, and monitor adverse selection risk**, allowing the system to anticipate order book imbalances and volatility inflections before they appear on conventional timeframes. **Intraday decay curves, transaction cost models, and slippage analysis** align execution with optimal liquidity windows, ensuring minimal market footprint without compromising conviction trades. **Volatility clustering models** further refine gross and net exposure levels, ensuring drawdown containment without sacrificing convex upside capture

HFA is market data in motion—its insights inform the continuous calibration of our quantitative models, the live adjustment of strategies, and the anticipation of inflexion points in market regimes. The result is resilience at high speed: the ability to act decisively under conditions of uncertainty, while maintaining a coherent long-term strategic framework

> *In qsif's investment framework, **HFA** functions as the **timing oracle**—shaping the cadence of portfolio decisions by **fusing predictive analytics with live feedback loops** that continuously recalibrate signals and strategies*

qsif SECTOR ROTATION LONG-SHORT FUND

The Money Managers and Analysts are responsible for the portfolio management
(including idea generation, portfolio construction, security selection, investment research, dynamic rebalancing and risk management of the Fund)

Sandeep Tandon | Founder & Chief Investment Officer

Sandeep is the Founder & Chief Investment Officer of the quant Money Managers, which has grown to an AUM of approximately INR 96,000 crore from under INR 200 crore in just four years. Sandeep has built the mutual funds business from ground up, honing a culture of excellence and innovation. His entrepreneurial skills have established a mutual fund, which has captured the imagination of the modern investor base, and reached out to the length and breadth of vivid Bharat, now totaling over 9.6 million folios. He has channeled his vast experiences, interests and novel thinking into building the predictive analytics framework and the dynamic VLRT investment framework of the quant group. It is these frameworks coupled with his deep understanding of various asset classes at a global level, including credit, commodities, equities and now digital currencies that enable Sandeep in definitive identification of market inflexion points and arriving at conclusive micro and macro calls.

Sandeep's credentials as a global macro strategist are well established. As a behavioral house, quant engages multiple proprietary indicators and believes in the study of cycles to find inflexion points, using predictive analytics. Sandeep has a strong belief in quant Group's role as a knowledge partner in creating awareness about latest developments in investment philosophy and ideas, such as behavioral research. It is for this reason that he believes investor education is of utmost importance and the group, under his leadership, has undertaken many initiatives in this regard. Based on this belief, quant has authored 'Being Relevant' and 'quantamine: inception to infinity'. These books build on research covering decades, even centuries of data points, distilled through quant's VLRT & MARCOV investment frameworks and predictive analytics indicators. They further outline the potential trajectory for the world in the coming decades that can help money managers and investors prepare for volatile times, which will upend the conventional analytical methods and beliefs of the past decades.

Sandeep has vast experience of over 33years in the capital markets. His journey in the money management business started in FY 1992-93 with GIC mutual fund (a JV partner with George Soros in India) where he was a trainee. He later joined IDBI Asset Management, where he was a founding member and a part of the core team that initialized the asset management business. He played a key role in devising, conceptualizing and marketing one of India's most successful mutual fund schemes: IDBI I-NITS 95. Furthermore, Sandeep worked in pivotal positions at several reputed financial services firms including ICICI Securities (a JV partner with J P Morgan in India), Kotak Securities (a JV partner with Goldman Sachs in India) and REFCO (erstwhile global derivatives firm). He has also worked at the Economic Times Research Bureau (a research wing of Bennett, Coleman and Company Limited).

qsif team

Sameer Kate | Money Manager

Sameer has over two decades of experience in Indian equities and derivatives dealing. Prior to joining quant MF, Sameer was Sr. Sales Trader at Investec Capital covering equity and derivatives trading for domestic and foreign institutional clients. He has also worked for over 16 years at Kotak Securities as a Sales Trader. Sameer has completed Bachelor of Computer Science from Pune University and an MBA from IME Pune.

Jignesh Shah | Money Manager

Jignesh brings over three decades of experience in the securities markets, having begun his investment career in 1993. Over this period, he has developed deep expertise across equity, macroeconomic, and commodity markets, shaped by his experience through multiple global market cycles. He has had prior professional engagement with the Quant group and has developed a strong familiarity with its investment philosophy, institutional processes, and disciplined risk management framework. Earlier in his career, he worked with Nippon Life AMC as an Investment Analyst, where he tracked global commodities and built a strong foundation in fundamental research. He subsequently held senior portfolio management positions at leading asset management firms including ICICI Prudential AMC and Aditya Birla Sun Life AMC, where he successfully managed diversified equity portfolios across varying market conditions. His experience and familiarity with quant's investment framework further strengthen the continuity, depth, and institutional robustness of the investment team.

Ankit Pande | Money Manager

Ankit has an experience of over 13 years in Indian equities. He started his career in core banking software with Infosys' Finacle, then moved in to equity research, along the way picking up the (U.S. based) CFA charter and a masters in business administration from The Chinese University of Hong Kong in 2017, being placed on the school's Dean List. He won the Thomson Reuters StarMine Award for best stock picker in the IT sector in 2014 and is a lifetime member of the Beta Gamma Sigma academic honour society.

Sanjeev Sharma | Money Manager

Sanjeev has been associated with various schemes of quant mutual fund since 2005. Sanjeev specializes in analysis of credit risk and is responsible for monitoring and assessing investment opportunities across asset classes. Sanjeev brings along a rich and diverse experience in the Capital Markets of over 18 years to his role of a Money Manager. He has obtained an M'Com, PG Diploma in Business Administration (Finance) and Certified Treasury Manager (Forex & Risk Management).
